## SPILL KIT MANAGEMENT SERVICE

By using our Spill Kit Management Services, your Spill Kits are always fully stocked ready for super quick response to your next emergency spill. The service is designed to assist with your sites environmental compliance in accordance with legislation.

We offer Spill Kit Management Services at periodic intervals, Quarterly, Bi-monthly or Monthly, depending on your sites specific requirements. Each on-site visit will include an itemised report of Spill Kit usage.

### EACH VISIT WILL INCLUDE:

- > Spill Kit contents replenished if required
- > Spill Kits cleaned & dated for due diligence
- > Itemised reporting of Spill Kit usage documented
- > Technical Support and on-site recommendations available from our trained staff

### PERIODIC OPTIONS:

QUARTERLY (4 SITE VISITS PER YEAR)

BI-MONTHLY (6 VISITS PER YEAR)

MONTHLY (12 VISITS PER YEAR)

ADDITIONAL SERVICE CALL OUT ALSO AVAILABLE

## FIRST AID ON-SITE INSPECTION SERVICE

Let our team help keep your First Aid Cabinets compliant

### EACH VISIT WILL INCLUDE:

- > First Aid Kits, Audited and on the spot replenishment of items missing or expired
- > First Aid Kits are Dated, with a report checklist for your compliance requirements

### PERIODIC OPTIONS:

QUARTERLY (4 SITE VISITS PER YEAR)

BI-MONTHLY (6 VISITS PER YEAR)

MONTHLY (12 VISITS PER YEAR)

ADDITIONAL SERVICE CALL OUT ALSO AVAILABLE

## EMERGENCY SHOWER & EYEWASH INSPECTION

Are your emergency showers & eyewash stations working effectively in the event of an emergency?

Super Safety Solutions offers an Emergency Shower and Eyewash Inspection service, which includes testing the performance of your units against the requirements of the Australian Standards AS 4775-2007

### INSPECTION INCLUDES:

Trained Technicians will inspect each of your emergency shower and eyewash units, identifying any non-conformances with the Australian Standard AS 4775-2007 using our audit checklist.

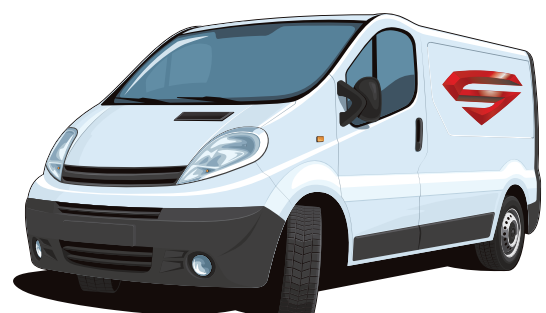

All non-conformances will be rectified and replacement parts and signage fitted with your consent.

Each unit is cleaned and an inspection tag fitted to record the date of inspection.

A report documenting the result of the inspection will be provided, inclusive of pass or fail areas, measurements of flow rates and photographic evidence of units operations and actions required or recommendations.

# TRAINING WORKSHOPS

## **SPILL RESPONSE** TOOLBOX

Our Spill Response Training workshop is an interactive course, which provides the necessary skills to enable personnel to effectively respond to on-site spills. This course will assist with meeting ISO14001 accreditation and legislation compliance. The main objective of this course is to ensure that those required to respond to an incident and use the site spill kits, are prepared to take action

## **GENERAL GUIDE TO HANDLING EMERGENCY SPILL INCIDENTS** WORKSHOP

Our Spill Response Training workshop is an interactive course, which provides the necessary skills to enable personnel to effectively respond to on-site spills. This course will assist with meeting ISO14001 accreditation and legislation compliance. The main objective of this course is to ensure that those required to respond to an incident and use the site spill kits, are prepared to take action. This is a very practical course covering environmental legislative requirements: safety, spill response products and an interactive role-play based on a liquid spill incident.

## **CYTOTOXIC COMPOUNDS SPILL RESPONSE** WORKSHOP

Our Cytotoxic Compounds Spill Response Training workshop is an interactive course, which provides the necessary skills to enable personnel to effectively respond to on-site Cytotoxic spills. The main objective of this course is to ensure that those required to respond to an incident and use the Cytotoxic spill kits, are prepared to take action and understand the effects from exposure to Cytotoxic compounds. This is a very practical course covering Safety & Environmental legislative requirements.
